INTRODUCTION

Our project is to build a Text Translate website using django with library Googletrans. is a free and unlimited python library that implemented Google Translate API. This uses the [Google Translate Ajax API](#) to make calls to such methods as detect and translate.

REQUIREMENT

- Python: Download and Install from browser
- Django Library: Using command line to install " pip install django "
- Compatible with Python 3.6+
- googletrans Library: Using command line to install " pip install googletrans==4.0.0-rc1"
